

4 Questions

Are you a human being trying to have a spiritual experience, or are you a spiritual being having a human experience? (Life)

One contains un-truths from the mind-ego. The other comes from the heart felt truths instilled upon your soul.

A "gift from God" prior to your coming into this human-experience-existence.

Is your "gift" of the "Holy Spirit" still sitting under your "tree" and for how long?

Hint: The wrapping = (human), does not show the gift. The human trying to have the spiritual experience is guessing what the gift is, a futile process.

The Holy Spirit, the gift from God, flows from His Spirit into the human spirit and through the human life existence, not the other way around.

Now, how or where from, will be your thinking?

Then, what are you gonna do about it?

Implement the new plan.
